- 4) **Subsidiary Company:** There has not been any trading operation of the subsidiary company during the period under review.
- 5) **Reasons for Low Operational Performance:**
 - A poor supply and higher cost of raw cotton, the basic raw material of the factory, due to disruption of supply chain since July, 2024.
 - Wages of the factory workers has been increased by 10% as per Govt. Directives.
 - The operations of the factory remained closed for several days in the month of July, 2024 due to imposition of curfew.
 - Titas Gas, which is our main source of power supply, has increased its tariff by 87% since February, 2023.
 - Fluctuation in the US Dollar to Taka rate has raised the price of imported raw cotton. The price of the US Dollar has since increased by about 44%.

The above reasons, among others, have caused increase in the cost of production during the period under review. However, in order to keep the factory in operation; we have to sell our products without any profit margin. Consequently, the first half of the accounting year 2024-2025 has experienced operational loss leading to a negative EPS of (-) Tk. (0.12). It may, however, be stated here that due to relentless efforts by the management, the loss of first half of the financial year 2024-2025 has been reduced to (-) Tk. 0.12 compared to (-) Tk. 0.20 during the corresponding period of 2023-2024.
