**1 Statement of Compliance**

These Condensed Consolidated Financial Statements do not include all the information as required for full annual financial statements, and have been prepared in accordance with Bangladesh Financial Reporting Standards.

**2 Accounting Policies**

The Company has applied the same accounting policies and methods of computation for the interim financial statements as in the annual financial statements as of and for the year ended June 30, 2017.

- 3 The textile spinning factory of the Company went through BMRE process and many productive machinery remained dismantled for the purpose. Hence there had been substantial production loss during the period under review. There was no "Non-Operating Income" during the period leading to decreased Earning Per Share which in turn was due to reduction in the balance of investment in FDR as the money has been invested in the Export Oriented Unit and in BMRE.
- 4 The Property, Plant & Equipment and Capital Work-in-Progress include an amount of Tk. 8909.22 lacs which has been invested for the 100% Export Oriented Unit and in the BMRE program of the Company, mostly from the Rights Issue Fund and partly from bank finances.
- 5 Two import documents of the capital machinery for the 100% Export Oriented Unit have been released by Agrani Bank Ltd. by creating a PAD loan under current liabilities. This has resulted the increase in Capital Work-in-progress and corresponding liability amount.
- 6 The paid-up capital increased by 10% due to approval given by the shareholders in the 37th AGM for 10% stock dividend. The accounting effect has been given in January, 2018 crediting the stock dividend to the respective shareholders' BO Account. The accounting reflection, therefore, now shows in the 3rd quarterly accounts as of 31st March, 2018 resulting in lower EPS, lower NOCFPS and reduction in Retained Earnings Balance.
